Madeline Turbes from AAN's Health Policy Team

The WSMA designates this live activity for a maximum of 7.75 AMA PRA Category I Credits™.

Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Objectives

Identify how to approach the diagnosis and treatment of ataxia and community resources for ataxia patients and family members.

Diagnose common and rare hyperactive cranial nerve disorders.

Explain mechanisms and initiate treatment for common and rare hyperactive cranial nerve disorders.

Understand the difference between primary palliative care, delivered by all neurologists and specialty neuropalliative care. Integrate specialty neuropalliative care with primary care services.

Improve your ability to have difficult conversations with patients and their families.

And more!
